PROFESSIONAL SUMMARY

Mobile Application Developer with 4.5+ years of experience designing, building, and shipping production Flutter applications across Android and iOS, supported by hands-on Python and backend development. Currently Mobile App Development Lead for a product-based multi-vendor events marketplace, owning the application end to end from architecture and product planning through App Store and Google Play release. Experienced across Flutter, Dart, REST API integration, Firebase, state management, and SQL and NoSQL databases, with a consistent record of turning product requirements into reliable, well-tested releases.

TECHNICAL SKILLS

Languages: Dart, Python, JavaScript, Java (Android)

Mobile Development: Flutter, Android, iOS, Cross-Platform App Development, App Store Connect, Google Play Console

State Management and Architecture: BLoC / Cubit, Riverpod, GetX, Provider, Stacked (MVVM), MVC Architecture

Backend and APIs: Django, Flask, Spring Boot, REST APIs, Webhooks

Frontend: HTML, CSS, JavaScript, Bootstrap, React

Databases: MySQL, PostgreSQL, Firebase Cloud Firestore, SQLite, Hive, Redis

Payment Gateways: Cashfree (Easy Split, split-after-success settlement, webhooks), Stripe

Cloud and Services: Firebase (Authentication, Firestore, Cloud Messaging, Storage), AWS (S3, CloudFront)

Tools and Platforms: Git, GitHub, Postman, Figma

Practices: Agile, CI/CD, Code Review, QA Coordination, Regression Testing, Data Structures and Algorithms

PROFESSIONAL EXPERIENCE

Occazone Pvt. Ltd. | Kerala, India

Mobile App Development Lead | October 2025 - Present

- Lead mobile application development for Occazone, a product-based multi-vendor events marketplace connecting customers with convention halls, party halls, photographers, makeover studios, caterers, and transportation vendors across Kerala.
- Own the Flutter application end to end, covering architecture, feature development, and release management, and drive App Store and Google Play submissions through review to launch.
- Integrated Cashfree Easy Split payments with a split-after-success settlement flow and webhook-driven booking confirmation to handle multi-vendor orders.
- Implemented Firebase Cloud Messaging with semantic notification routing so users receive timely booking and payment updates.
- Partner with founders and cross-functional teams on product-domain discussions and development-roadmap planning, translating business goals into technical requirements and prioritized delivery.
- Collaborate with backend (Spring Boot, PostgreSQL, Redis) and web (React) teams to keep mobile, API, and web releases aligned, and coordinate QA and defect triage ahead of each release.

Ecochoice Naturals Pvt. Ltd. | Kerala, India

Software Developer (Flutter and Python) | October 2024 - September 2025

- Maintained and optimized a production Agri-Tech Flutter application, integrating backend enhancements and resolving over 90 percent of user-reported bugs.
- Managed and deployed backend server updates, API endpoints, and environment configurations, reducing downtime by approximately 30 percent and speeding up feature rollout.
- Led end-to-end development across mobile and backend architecture, ensuring seamless integration, performance tuning, and high availability of critical systems.
- Improved AI and ML model performance by approximately 25 percent through labelling farm-produce image datasets (millet, rice, wheat) and streamlining dataset accuracy.

- Supported AI model integration across training-data pipelines and deployment, improving automation in quality-grading workflows.
- Coordinated QA checks and regression testing each release cycle to keep the application stable and reliable.

Futura Labs | Kerala, India

Flutter Developer | June 2023 - October 2024

- Built and shipped multiple Flutter applications, optimizing state management with GetX and Provider to improve performance by approximately 40 percent and reduce bugs.
- Integrated Firebase Authentication and Cloud Firestore for authentication, storage, and notifications, cutting login times by approximately 50 percent and lifting user engagement.
- Mentored 15 or more interns through agile practices and code reviews, contributing to a strong intern-to-full-time conversion rate.
- Ran code reviews and introduced best practices, improving code quality by approximately 20 percent and reducing technical debt across projects.
- Recognized as Best Performer of the Month.

Riss Technology | Kerala, India

Associate Software Developer | May 2022 - June 2023

- Developed mobile applications using Flutter and native Android.
- Built responsive front-ends for 5 or more projects using HTML, CSS, JavaScript, and Bootstrap.
- Designed and maintained MySQL databases with optimized schemas via ORM, integrated with Django, improving data-retrieval efficiency by approximately 35 percent and cutting query execution time by approximately 20 percent.
- Led a process re-engineering effort that consolidated end-to-end service workflows and reduced paperwork by approximately 75 percent.

Trylogic Soft Solutions | Kerala, India

UI Developer Intern | February 2022 - May 2022

KEY PROJECTS

Occazone Mobile App (App Store and Google Play): Built the complete application architecture and a fully functional production application single-handedly. An event booking and planning platform where users self-book event services end to end, with an integrated direct payment gateway. Live on both the App Store and Google Play.

Occazone Drive: Companion driver application for the Occazone Tours and Travels package-booking module. A lightweight app that lets registered drivers update trip status in real time, keeping both customers and vendors informed.

Raitha Sahayak - AI Farm-Produce Quality-Checking App (Google Play): Marketplace connecting farmers and buyers with AI-based quality assurance, capturing images and details to generate AI quality reports. Owned overall app functionality, plus ML model training support, image labelling, website updates, and server-side work.

Krishi Connect - B2B Farmer-Buyer Marketplace (Google Play): B2B platform (Ecochoice Naturals Pvt. Ltd.) connecting buyers directly with farmers. Integrated Firebase Authentication and cloud photo retrieval for AI batch results, using Provider for state management to reduce complaints and boost engagement by approximately 30 percent.

JoinMeds (Medland) (Freelance, App Store and Google Play): Job-finding application built exclusively for the medical field, supporting both personal and public job search. Live on the App Store and Google Play.

EDUCATION

B.Tech, Electronics and Communication Engineering | Capital University | CGPA 7.8 | [Graduation Year]

Higher Secondary Education (Science) | 2015 - 2017
